

Released September 29, 2026, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, United States Department of Agriculture (USDA).

August Prices Received Index Up 1.9 Percent

The August Prices Received Index 2011 Base (Agricultural Production), at 135.5, increased 1.9 percent from July but decreased 2.0 percent from August 2025. At 113.2, the Crop Production Index was up 5.8 percent from last month and 6.2 percent from the previous year. The Livestock Production Index, at 153.7, decreased 2.2 percent from July and 8.5 percent from August last year. Producers received higher prices during August for strawberries, corn, soybeans, and lettuce but lower prices for cattle, grapes, milk, and calves. In addition to prices, the volume change of commodities marketed also influences the indexes. In August, there was increased monthly movement for cattle, grapes, calves, and broilers and decreased marketing of wheat, corn, soybeans, and strawberries.

August Prices Paid Index Down 1.2 Percent

The August Prices Paid Index for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW), at 159.8, is down 1.2 percent from July 2026 but up 5.3 percent from August 2025. Lower prices in August for feeder cattle, nitrogen, feeder pigs, and mixed fertilizer more than offset higher prices for diesel, hay and forages, other services, and complete feeds.

Prices Received, Prices Paid, and Ratio of Prices Received to Prices Paid Indexes 2011 Base – United States: August 2026 with Comparisons

August Prices Received by Farmers

Crop production: The August index, at 113.2, is 5.8 percent higher than July and 6.2 percent higher than August 2025. The grain & oilseed, fruit & tree nut and other crop index increases more than offset the vegetable & melon index decrease.

Grain and oilseed: The August index, at 83.7, is up 4.6 percent from July and 15 percent from August 2025. The oilseed, feed grain and food grain indexes were all up.

Feed grain: The August index, at 75.9, increased 5.7 percent from last month and 11.0 percent from a year ago. The corn price, at \$4.45 per bushel, is up 19 cents from last month and 49 cents from August 2025.

Food grain: At 85.3, the index for August increased 4.0 percent from the previous month and 22 percent from a year ago. The August price for all wheat, at \$6.23 per bushel, is 17 cents higher than July and \$1.39 higher than August 2025. The August price for rice, at \$12.80 per cwt, is \$1.00 higher than July but \$1.30 lower than August 2025.

Oilseed: At 97.1, the index for August increased 4.4 percent from July and 17 percent from August 2025. The soybean price, at \$12.10 per bushel, is 50 cents higher than July and \$2.10 higher than August a year earlier.

Fruit and tree nut: The August index, at 180.3, is up 3.2 percent from July and 2.0 percent from a year earlier. Price increases during August for strawberries, oranges, and apples more than offset price decreases for grapes, lemons, pears, and grapefruit.

Vegetable and melon: At 131.8, the index for August is down 1.6 percent from the previous month and 15 percent from August 2025. Price decreases during August for onions, celery, cantaloupes, and broccoli more than offset price increases for lettuce, potatoes, and tomatoes.

Other crop: The August index, at 100.9, is up 1.0 percent from the previous month and up 5.0 percent from August 2025. The all hay price, at \$190.00 per ton, is up \$6.00 from July and \$29.00 from August 2025. At 66.7 cents per pound, the price for upland cotton is 0.7 cent lower than July but 9.6 cents higher than August 2025.

Livestock production: The index for August, at 153.7, decreased 2.2 percent from the previous month and 8.5 percent from August a year earlier. Meat animal, dairy and poultry & egg indexes are all down.

Meat animal: At 186.4, the August index decreased 4.5 percent from the previous month and 2.1 percent from a year earlier. At \$70.50 per cwt, the August hog price is 50 cents lower than July and \$9.30 lower than a year earlier. The August beef cattle price of \$231.00 per cwt is \$15.00 lower than the previous month and \$5.00 lower than August 2025.

Dairy: The index for August, at 98.5, is down 2.5 percent from the previous month and 5.3 percent from August a year ago. The August all milk price of \$19.80 per cwt is 50 cents lower than July and \$1.10 lower than August 2025.

Poultry and egg: At 133.5, the August index decreased 0.8 percent from July and 22.7 percent from August 2025. The August market egg price, at 77.0 cents per dozen, is 1.4 cents lower than July and \$1.43 lower than August 2025. The August broiler price, at 65.3 cents per pound, is 0.9 cent lower than July and 1.4 cents lower than a year ago. At \$1.30 per pound, the August turkey price is 4.0 cents higher than the previous month and 23.7 cents higher than August 2025.

Food Commodities: The index, at 147.5, increased 1.1 percent from the previous month but decreased 4.1 percent from August 2025.

Parity Price Overview

Parity prices, based on data from January 2026, and adjusted base price data from which parity prices are computed are presented in the tables on the following pages. Parity prices are computed under the provisions of Title III, Subtitle A, Section 301(a) of the Agricultural Adjustment Act of 1938 as amended by the Agricultural Acts of 1948, 1949, 1954, and 1956.

The parity prices shown in this report are based on the provisions of the amended Act. Briefly, the actual method of computation is as follows:

- a. The average of prices received by farmers for individual commodities for the 10 preceding years is calculated (for 2026, the 10-average includes the years 2016-2025). An allowance for unredeemed loans and other supplemental payments resulting from price support programs, such as the deficiency payments for grains and cotton, is included for those commodities for which applicable.
- b. This 10-year average is divided by the average of the Index of Prices Received by Farmers for the same 10 preceding calendar years, adjusted to include an allowance for unredeemed loans and other supplemental price support operations, to give an "adjusted base price".
- c. Parity prices are computed by multiplying the "adjusted base prices" by the current Parity Index (the Index of Prices Paid by Farmers, including Interest, Taxes, and Wage Rates, 1910-1914=100).

Parity prices are calculated in terms of prices received by farmers in the local markets in which they ordinarily sell. This means that the parity prices apply to the average of all classes and grades of the commodity as sold by all farmers in the United States, except as otherwise specified. Fruits and vegetables for fresh use and for processing are usually considered separate commodities and separate parity prices are calculated. The Agricultural Marketing Agreement Act of 1937 provided for parity prices for certain commodities covered by a marketing agreement or order program. Under present legislation, United States parity prices, with appropriate adjustments where needed, may be used for the purpose of this Act.

Commodity Parity Prices and Price as Percent of Parity Price – United States: August 2026 with Comparisons

[Parity prices are computed under the provisions of Title III, Subtitle a, Section 301 (a) of the Agricultural Adjustment Act of 1938 as amended by the Agricultural Acts of 1948, 1949, and 1956. See February *Agricultural Prices* for details on adjusted base price and parity price computations. Parity data not available for blank cells. Primary source of data for livestock and milk prices is United States Department of Agriculture's Agricultural Marketing Service]

Reliability of Prices Received Estimates

Definition: Prices received represent sales from producers to first buyers. They include all grades and qualities. The average commodity price from the survey multiplied by the total quantity marketed theoretically should give the total cash receipts for the commodity.

Survey procedures: Primary sales data used to determine grain prices were obtained from probability samples of about 1,900 mills and elevators. These procedures ensure that virtually all grain moving into commercial channels has a chance of being included in the survey. Generally, States surveyed account for 90 percent or more of total United States production. Livestock prices are obtained from packers, stockyards, auctions, dealers, and market check data from AMS-USDA, private marketing organizations, and state commodity groups and agencies. Inter-farm sales of grain and livestock are not included since they represent very small percentages of the total sales. Grain marketed for seed is also excluded. Fruit and vegetable prices are obtained from sample surveys and market check data from AMS-USDA, private marketing organizations, state agencies, and universities.

Summary and estimation procedures: Survey quantities sold are expanded by strata to state levels and used to weight average strata prices to a state average. State prices are then weighted to a United States price based on expanded sales. Recommendations are prepared by the Regional Field Offices and reviewed by the Agricultural Statistics Board in Washington, D.C. State recommendations are reviewed for reasonableness with survey data, other States, and recent historic estimates.

Revisions: In general, revisions are made during annual commodity market year estimation time, following five-year Census revisions, or when later information is received. Revisions are published in monthly issues of *Agricultural Prices*.

Reliability: United States price estimates based on probability surveys generally have a sampling error of less than one percent for the major commodities such as corn, wheat, soybeans, cotton, and rice. Current methods of summarization for non-probability commodities are not designed directly to calculate sampling errors. However, analytical measures approximate the United States relative sampling errors at around five percent. Any non-sampling errors are attributed to such things as the inability to obtain correct information, differences in interpreting questions or definitions, mistakes in coding or processing the data, etc. Efforts are made at each step in the survey process to minimize these non-sampling errors.

Program Changes: See Price Program Links at the end of this report for details on program changes to the Prices Program methodology.

August Prices Paid by Farmers

The August Prices Paid Index for Commodities and Services, Interest, Taxes, and Farm Wage Rates (PPITW), at 159.8, is down 1.2 percent from July 2026 but up 5.3 percent from August 2025.

Production: The August index, at 159.5, is down 1.7 percent from July but 6.3 percent above last year. Lower prices for feeder cattle, nitrogen, feeder pigs, and mixed fertilizer more than offset higher prices for diesel, hay and forages, other services, and complete feeds.

Feed: At 114.8, the August index increased 1.0 percent from July and 8.5 percent from last August. Since July, higher prices for hay and forages, complete feeds, feed grains, and concentrates more than offset lower prices for supplements.

Livestock and poultry: The August index, at 246.8, decreased 6.7 percent from July and 0.4 percent from last year. Since July, prices are lower for feeder cattle and feeder pigs. The August feeder cattle price, at \$367.00 per cwt, is down \$29.00 per cwt from the July price. The August feeder pigs price, at \$164.00 per cwt, down \$24.00 per cwt from July.

Fertilizer: The index for August, at 133.2, is down 4.5 percent from July but 11 percent above August a year ago. Since July, lower prices for nitrogen and mixed fertilizer more than offset higher prices for potash and phosphate.

Chemicals: The August index, at 110.9, is unchanged from July but down 5.8 percent from last August.

Fuels: At 116.7, the August index is up 7.2 percent from July and 35 percent above August 2025. Compared with July, prices are higher for diesel and gasoline but lower for LP gas.

Machinery: The index for August, at 173.8, increased 0.4 percent from July and 2.1 percent above last August. Compared with last month, prices are higher for other machinery and tractors but unchanged for self-propelled machinery.

Consumer Price Index: The August 2026 Consumer Price Index for All Urban Consumers (CPI-U), as issued by the Bureau of Labor Statistics, increased 3.4 percent over the last 12 months to an index level of 334.980 (1982-1984=100). For the month, the index increased 0.3 percent prior to seasonal adjustment.

Feed Price Ratios – United States: August 2026 with Comparisons

Feed price ratio ¹	August 2025	July 2026	August 2026
Broiler-feed: pounds of broiler grower feed equal in value to 1 pound of broiler, live weight ²	6.0	5.3	5.0
Market egg feed: pounds of laying feed equal in value to 1 dozen eggs ³	23.2	7.4	7.0
Hog-corn: bushels of corn equal in value to 100 pounds of hog, live weight	20.2	16.7	15.8
Milk-feed: pounds of 16% mixed dairy feed equal in value to 1 pound of whole milk ⁴	2.47	2.12	2.00
Steer & heifer-corn: bushels of corn equal in value to 100 pounds of steer & heifers, live weight	60.4	58.5	52.6
Turkey-feed: pounds of turkey grower equal in value to 1 pound of turkey, live weight ⁵	10.7	11.0	10.9

¹ Effective January 1995, prices of commercial prepared feeds are based on current United States prices received for corn, soybeans, alfalfa hay, and all wheat.

² The price of commercial prepared broiler feed is based on current United States prices received for corn and soybeans. The modeled feed uses 58 percent corn and 42 percent soybeans.

³ The price of commercial prepared layer feed is based on current United States prices received for corn and soybeans. The modeled feed uses 75 percent corn and 25 percent soybeans.

⁴ The price of commercial prepared dairy feed is based on current United States prices received for corn, soybeans, and alfalfa. The modeled feed uses 51 percent corn, 8 percent soybeans, and 41 percent alfalfa.

⁵ The price of commercial prepared turkey feed is based on current United States prices received for corn, soybeans, and wheat. The modeled feed uses 51 percent corn, 28 percent soybeans, and 21 percent wheat.

	(dollars)	(dollars)	(dollars)
Feeder cattle & calvescwt	370.00	396.00	367.00
Feeder pigscwt	180.00	188.00	164.00

Reliability of Prices Paid Estimates

Definition: Prices paid by farmers represent the average costs of inputs purchased by farmers and ranchers to produce agricultural commodities. Conceptually, the average price when multiplied by quantity purchased should equal total producer expenditures for the item.

Survey procedures: The prices paid data are obtained from establishments that sell goods and services to farmers and ranchers. Annually, about 8,500 firms are randomly selected from lists by type of item sold with an average response rate in the range of 75-80 percent. Firms are asked to report the price for the specified item "most commonly bought by farmers" or that was the "volume seller". Approximately 135 items are surveyed each March to represent all production input items purchased. The survey reference period for all items is the full preceding calendar year. Separate prices paid surveys are conducted for agricultural chemicals, fuels, feed, fertilizer, machinery, and seed.

Summary and estimation procedures: The annual March Prices Paid Survey is summarized as a non-probability survey. Average prices reported are aggregated to the region and United States level using weights available from expenditure data and other administrative sources. Price recommendations are prepared by the Regional Field Offices and Headquarters for review by the Agricultural Statistics Board in Washington, D.C. Also, the change in price level for individual items surveyed are combined to the regional and United States levels, and are published as prices paid indexes referenced to a specific base period. Prices paid indexes for new autos and trucks, building materials, farm supplies, motor supplies, and marketing containers are updated based on price changes measured in selected Bureau of Labor Statistics (BLS) indexes.

Revisions: Any revisions are published in the monthly and in annual issues of Agricultural Prices. The basis for revision must be supported by additional data that directly affect the level of the estimate. More revisions are likely for March when separate prices paid surveys are conducted, in lieu of BLS indexes, by the USDA to measure price change.

Reliability: Current methods of summarization for the March data are not designed directly to calculate sampling errors. However, analytical measures approximate the United States relative sampling errors for major items around 10 percent. Any non-sampling errors are attributed to such things as the inability to obtain correct information, differences in interpreting questions or definitions, mistakes in coding or processing the data, etc. Efforts are made at each step in the survey process to minimize these non-sampling errors.

Program Changes: See Price Program Links at the end of this report for details on program changes to the Prices Program methodology.

Access to NASS Reports

For your convenience, you may access NASS reports and products the following ways:

- All reports are available electronically, at no cost, on the NASS web site: www.nass.usda.gov.
- The national specific reports are available via a free e-mail subscription. To set-up this free subscription, visit www.nass.usda.gov and click on “National” in upper right corner above “search” box to create an account and select the reports you would like to receive.
- Economics, Statistics, and Market Information (ESMIS) – National Agricultural Library (NAL) website houses NASS’s and other agency archived reports at <https://esmis.nal.usda.gov>. All email subscriptions containing reports will be sent from <https://esmis.nal.usda.gov>. To receive the reports via e-mail, you will have to go to the website, create a new account and subscribe to the reports. You should whitelist notifications@esmis.nal.usda.gov in your email client to avoid the emails going into spam/junk folders.

For more information on NASS surveys and reports, call the NASS Agricultural Statistics Hotline at (800) 727-9540, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@usda.gov.

If you have specific questions you would like an expert to respond to, please visit our “Ask A Specialist” website at www.nass.usda.gov/Contact_Us/Ask_a_Specialist.

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at [How to File a Program Discrimination Complaint](#) and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.
